**TITLE: POUUDRE FIRE AUTHORITY JOINS U.S. FIRE ADMINISTRATION'S  
INSTALL. INSPECT. PROTECT. CAMPAIGN *ENCOURAGING RESIDENTS  
TO INSTALL SMOKE ALARMS AND SPRINKLERS***

Fort Collins, CO –More than 3,000 people die in home fires each year in the United States; most of whom are in homes without a working smoke alarm. To prevent these deaths, the U.S. Fire Administration (USFA), a division of the Federal Emergency Management Agency (FEMA) is sponsoring a nationwide ***Install. Inspect. Protect. Campaign*** designed to raise awareness about how working, properly installed smoke alarms can lower a person's chances of dying in a fire.

The USFA's ***Install. Inspect. Protect. Campaign*** is aimed at encouraging Americans to practice fire safety by installing and maintaining smoke alarms and residential fire sprinklers, which can help save the lives of residents and fire fighters, practicing fire escape plans, and performing a home safety walk-through to remove fire hazards from the home.

**Poudre Fire Authority is supporting this critical effort through the USFA's *Install. Inspect. Protect Campaign* to reduce injuries and the loss of life by starting a new Residential Safety Program. Homeowners can make an appointment with firefighters who will go to homes and conduct a safety survey.**

Poudre Fire Authority is proud to be a partner with the USFA in this very relevant campaign. Far too many people have died in fires as a result of not having working smoke alarms or sprinklers. One person killed in a home fire is just too many," said Fire Chief John Mulligan. "Together, we can educate our communities and help save lives."

"If a fire breaks out in your home while you're asleep, how will you know? Having a working smoke alarm is like having a fire safety official on duty in your home, 24 hours a day." said Deputy U.S. Fire Administrator Glenn A. Gaines. "Working smoke alarms will alert you to the fire and we know conclusively, a residential sprinkler system can help put the fire out." Gaines adds, "Smoke alarms and sprinklers are able to provide residents the time it takes to get everyone out of the house, before firefighters have to come in."

When both smoke alarms and fire sprinklers are present in a home, the risk of dying in a fire is reduced by 82 percent, when compared to a residence without either. According to the National Fire Protection Association, between 2003-2006, almost two-thirds of home fire deaths resulted from fires in homes with no smoke alarms or no working smoke alarms.

The USFA offers a few helpful tips on smoke alarms and sprinklers:

- Place properly installed and maintained smoke alarms **both inside and outside** of sleeping areas and on every level of your home.
- Interconnected smoke alarms are best, because if one sounds, they all sound.
- Get smoke alarms that can sound fast. The U.S. Fire Administration recommends that every residence and place where people sleep be equipped with both ionization **and** photoelectric smoke alarms **or** dual sensor smoke alarms, which contain both ionization and photoelectric smoke sensors.
- Inspect and test smoke alarms monthly and change alkaline batteries twice every year, or as instructed. You can use a date you already know, like your birthday or when you change your clocks as a reminder.
- If possible, install residential fire sprinklers in your home.
- Avoid painting or covering the fire sprinkler, because that will affect the sensitivity to heat.

Organizations in partnership with the U.S. Fire Administration's ***Install. Inspect. Protect. Campaign*** include the American Fire Sprinkler Association, Burn Institute, Everyone Goes Home, Fire and Emergency Manufacturers and Services Association, Fire Department Safety Officers Association, Home Fire Sprinkler Coalition, Home Safety Council, International Association of Black Professional Firefighters, International Association of Fire Chiefs, International Association of Women in Fire & Emergency Services, NASFM Fire Research and Education Foundation, National Association of Hispanic Firefighters, National Association of State Fire Marshals, National Fallen Firefighters Foundation, National Fire Protection Association, National Fire Sprinkler Association, National Volunteer Fire Council, and SAFE KIDS Worldwide.
